## PROJECT ABSTRACT: EVENT MANAGEMENT

**Submitted to: Ms Lisha Varghese**

**Asst.Professor MCA**

**Submitted by:   Melbin Augustine**

**RLMCA S7**

**Roll No: 43**

# Proposed System:

**Event Management System** (**EMS**) is a web based application that supports online registration and feedback evaluation for event training programs such as games, seminars functions marriage and workshops. It helps program attendees, organizers, the authors and the reviewers in their respective activities.

Development of Event management system is an attempt to address the problems of managing registration forms, feedback forms and evaluating feedback. The main goal of this software is to give working solution to store, manage and consolidate the registration data and the feedback data.

# Modules:

- Admin
- Customers
- Mangers
- Event handlers
- Program committee
- Staff and priorities

# Advantages:

- The Event Management Industry has a high potential for growth in the coming years.
- It helps you build a strong professional network as you work with people across different domains.
- It helps you increase your confidence level and improve your interpersonal and communication skills.
- If you are someone who loves communication and is a go-getter, a career in the field of Event Management would bring to you immense satisfaction
- Develop company's business profile
- End to end execution

## Disadvantages:

- It is a very demanding and stressful job which requires 24x7

- The deadlines and targets are too specific and difficult to catch up on with.

- It requires constant learning and keeping yourself up to date with the latest tools and techniques in the market.

- The work schedule is not fixed in such job profiles and requires you to be flexible in terms of timings.
